Audit Committee Chair on IIA

As Chairman of several Audit Committees, I am delighted to emphasize the paramount importance of being part of the Institute of Internal Auditors (IIA) for all internal audit professionals. In the dynamic realm of internal auditing, staying ahead is not just an advantage, but a necessity.

IIA offers a unique platform for continuous learning, providing exclusive access to a global knowledge hub. Resources like the Webinar Library, Smart Briefs, Knowledge Centres, and research empower members to navigate challenges effectively. With several Global Training Module-based programs covering critical topics like risk-based auditing and cybersecurity, the IIA helps in preparing its members with enhanced capabilities enabling them to contribute significantly to organizational governance amidst today's volatile business landscape.

Feedback on Global Training Module

The Institute of
Internal Auditors
India

The GTM program is quite different from other training programs from the point of view of implementation. The training programs not only provide 'What' aspects but also provide 'How' aspects. This makes the whole differentiation. The 'How' part of the program provides tools to actually implement the learning into our audit process and make our audit process effective.

The GTM program on Root Cause Analysis was organized for the internal audit as well as investigation team members in our annual Synergy meet, where Nikhil Kenjale provided us with very practical and easy to deploy tools to reach out to the exact root cause of the observations. The course demonstrated step by step method to reach out to root cause, the interactions required with auditees, clarifications of all the doubts and queries. The course duration was quite adequate for the subjects. What I like more about the course are the case studies which are posed after each sub-modules, which makes the participants to think and apply the learning, discuss the difficulties within group and then the mentor clarifying the case studies. This approach provides the clarity and confidence of applying these techniques to real life situations.

As an internal audit professional, I strongly recommend these training programs for IA teams at all the maturity levels and also in the IA practitioners circles.

Feedback on Customised Training

The Institute of
Internal Auditors
India

I am delighted to share the success of our collaboration with the Institute of Internal Auditors of India (IIA), where LIC engaged IIA to conduct extensive training for about 320 internal auditors drawn from various departments. The dedication and commitment demonstrated by the experienced faculty members from IIA during these three-day residential courses, held at 8 locations, have been truly commendable. The sessions not only added substantial value through their well-structured and rich content but were also conducted with a level of professionalism that garnered widespread appreciation from our entire team.

We express our gratitude for the impactful training provided by IIA and eagerly anticipate such yearly sessions that will undoubtedly contribute to further enhancing the capabilities of our internal audit team.
